### About Me

I am a self taught developer specializing in building web applications using **php and mysql**. Laravel is my framework of choice and I use **vuejs** and **tailwind** css for frontend. have worked on web projects like **ecommerce shops** and **real time chat applications**. Recently, I am learning to improve my Test Driven Development ( TDD ) skills with Laravel.

---

### Skills

Laravel ( 5.8 - 9.0 ), Vuejs ( 2, 3 ), MySQL, Laravel Livewire, TailwindCSS, Inertia.js, NuxtJS, Lara socket, AlphineJS

---

### Projects

#### Imessage September 2021 - November 2021

- The project was a **real time chat** application.
- Logged in users can perform CRUD operations on rooms.
- Users can join / leave chat rooms and chat with others.
- Technologies: **Laravel, Vuejs, Inertia js, Lara Socket, Tailwind CSS**

#### Footwear October 2019 - December 2020

- The project was an **ecommerce** site for ordering shoes.
- Guests can purchase products using **Cash on Delivery and Stripe payments** and can also register and log in.
- Customers can view all their purchases, rate and search products.
- **Dashboard** was built to perform CRUD operations for the shop owner. Eg. products, categories.
- Chart was used to display all the purchases.
- Shop owners have the ability to view lists of users and purchases.
- Technologies: **Laravel, Vuejs, Tailwind CSS**.

#### Picgram July 2019 - November 2019

- The project was an **Instagram-like photo sharing site** .
- Users can upload posts with multiple images.
- Users can perform search, like & comment on posts and also follow / unfollow other users.
- Users can view their followers, followings and posts on their profile page.
- Technologies: **Laravel, Vuejs, Tailwind CSS**.

#### Cool Kapada June 2021 - August 2021

- The project was an **ecommerce** web application.
- **Stripe** and **Cash on Delivery** were used as a payment processor .
- **Dashboard** was built to do CRUD operations for the owners. Eg,

- products, categories.
- Products can be filtered by colors & categories.
  - Technologies: **Laravel, Laravel Livewire, Alphnejs, Tailwind CSS.**
-
